

MOTORWAY VIGNETTE

In the Czech Republic, you must have a valid electronic vignette before entering a toll motorway.

You do not need to purchase an electronic vignette for:

- trailers and motorcycles,
- vehicles that are exempt from the fee (more information [here](#)).

ATTENTION! The vignette is not transferable between vehicles!

- A vignette is only valid for a specific vehicle. If you sell your car with a valid vignette, it remains valid for the new owner.
- If you change the licence plate number of a vehicle registered in the Czech Republic, you will keep the vignette:
 - o the change is made automatically if the information on the original and new number plate is available in the Vehicle Register. If you provided an email when you bought the vignette, a confirmation of the change will be sent to your email address. You can verify the number plate change [here](#).
 - o If the necessary information for an automatic number plate change is not available in the Vehicle Register, the change must be reported.

Keep the receipt for the purchase (payment) of the vignette! You will find the stamp authorisation code on it, which is needed in case you want to make any changes. Changes can only be made if the vignette has not yet become valid (and only within 30 days of purchase). Changes are irreversible and can only be made once.

- For example, you can change the starting date of validity, the licence plate number or the country of registration.

For more information on how to buy a vignette, please visit the official website: <https://edalnice.cz/index.html#/validation>
