

Electronic Citizen Identity (Eidentity)

The electronic citizen identity simplifies online communication with public authorities, enabling you to complete certain tasks remotely without visiting the relevant office in person.

An **electronic identity** consists of your personal data, which is verified in an online environment. To access online services, you must undergo a secure identity verification process. This is done using your [your identification credentials](#).

Identification Credentials (Most Commonly Used):

- Bank Identity
- eGovernment Mobile Key
- NIA ID

With an electronic citizen identity, you can log into the Citizen Portal, Data Mailbox, the Labour Office, or Czech Social Security Administration (ČSSZ).

Foreigners are required to present a valid residence permit in the Czech Republic to set up an electronic identity. Registration and subsequent verification must be completed in person at a Czech POINT office.

Information about electronic identity and login options can be found in a clear format at <https://chcidatovku.gov.cz/identita-obcana> or in more detail at <https://info.identita.gov.cz/>.
